<b>Office Action Summary</b>	<b>Application No.</b> 10/588,079	<b>Applicant(s)</b> KURODA ET AL.	
	<b>Examiner</b> Elizabeth E. Mulvaney	<b>Art Unit</b> 1794	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim refers to “the light absorption or light scattering film”. Claim 1 does not contain this feature. The claim should be dependent from claim 3.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5, and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 5,881,032 in view of EP 1416478 (see US 2005/0013225).

The ‘032 reference discloses a recording medium comprising two recording layers where the track path in each layer is in an opposite direction from the other. The layers each have a lead-in and lead-out area for management data. See Figure 1. It is recognized that the reference is silent as

Art Unit: 1794

to an area within either the lead-in or lead-out areas where the reflective layer (recording layer) is not present to allow for focusing light onto the next lead-in or lead-out area. However, the '478 reference show that it is known to eliminate the reflective layer or to adjust the reflective layer in a lead-in (management) area so that focusing can easily be achieved on the next recording layer. See [0047] and [0077-79]. Therefore, it would have been obvious to one of ordinary skill in the art to eliminate or adjust the lead-in or lead-out areas of the '032 medium. One would be motivated by the reasoned expectation of obtaining the improved focusing ability as taught in the '478 reference.

***Allowable Subject Matter***

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
